

BACK-END SEMICONDUCTOR SOLUTIONS

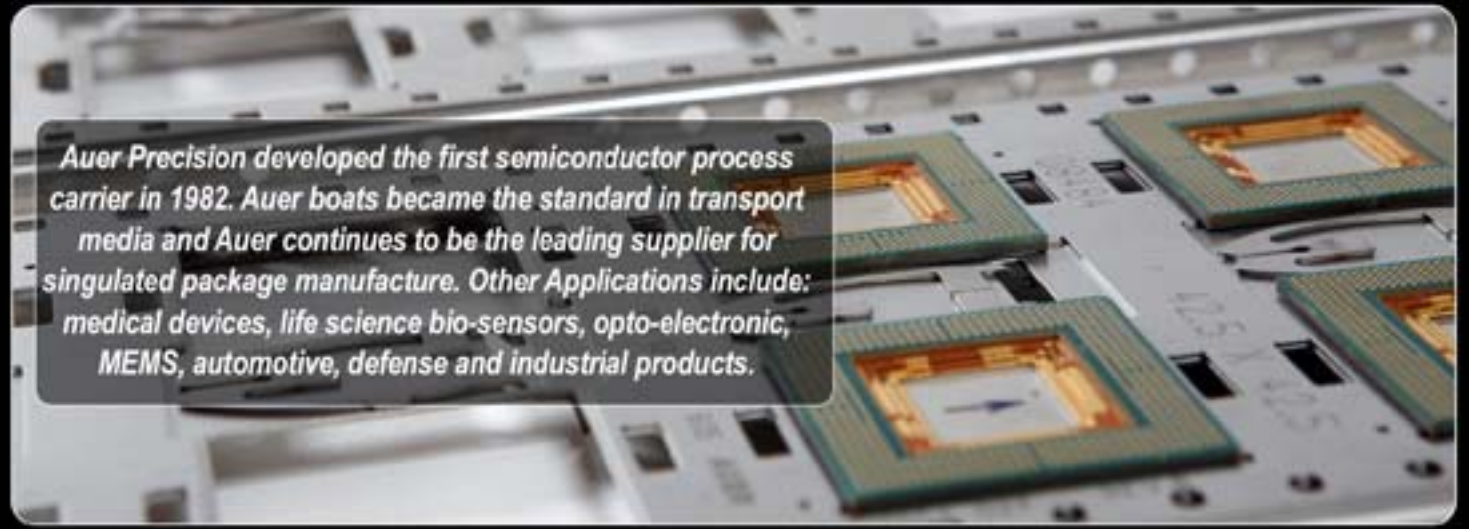

Your Product Demands:

- Accuracy
- Repeatability
- Design Leadership
- Reliability
- Process Experience

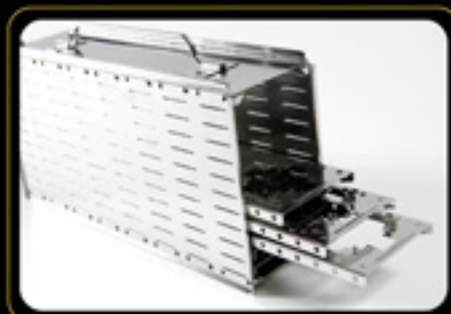

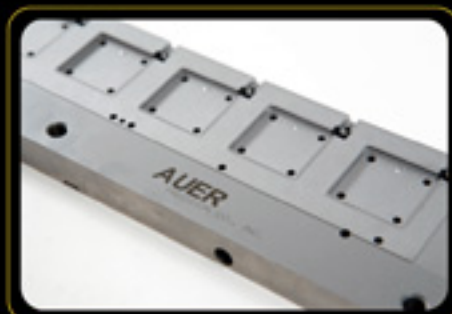

Manufacture Confidently with
Media Handling Solutions from

AUER
AUER Precision

Auer Precision developed the first semiconductor process carrier in 1982. Auer boats became the standard in transport media and Auer continues to be the leading supplier for singulated package manufacture. Other Applications include: medical devices, life science bio-sensors, opto-electronic, MEMS, automotive, defense and industrial products.

TRANSPORT MEDIA SOLUTIONS

More than \$1 Trillion of Semiconductors Have Been Built Using Auer Precision Products

- Collaborative Design with Customers and Equipment Vendors
- Custom and Standard
- Process Carriers (Over 20,000 Different Styles)
- Magazines
- Film Frames
- Heat Spreaders
- Trim and Form Tooling
- Spare and Replacement Tooling

FULL SERVICE

- Innovator of the Technology
- Set the Industry Standard
- Library of Over 20,000 Open Tools
- Diversity of Support (Product Design Support, Custom Engineering and Process Optimization)
- Successfully Qualified Products with Greater Than 2,000 Customers in Various Markets
- Compatible with All OEM Equipment
- Higher Quality, Consistency & Repeatability
- Competitive Pricing
- Fast delivery and Turnaround Time
- Product Robustness and Reliability
- Highest in Use Yield Demonstrated

PRODUCTS

- Transport Media Handling Solutions
- Back-end Process Tooling

DESIGN

- R&D and Prototyping Thru HVM
- Full Engineering Support
